

Fairy Fires or Seashell Flames

Using a seashell as a non-flammable holder of the fire. Place a dab of vaseline on the shell;

the vaseline holds the cotton in place -

Steel fire makes a spark, like using flint, but you could use a match or lighter. ALL NEED SUPERVISION

Alternative, tangerine candles - using the tangerine peel as the holder of the oil, you need a little bit of peel in the center to act as the wick

› Place the tangerine candles in a bowl of water - they look pretty and it is safer as the peel is flammable.
