

SEED COLLECTION 101

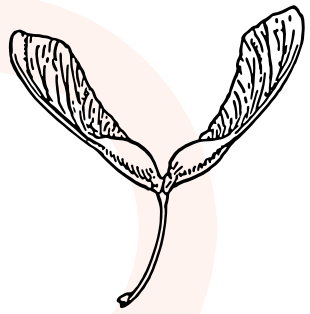

collect from a wide variety of plants, out in nature or from food you eat

collect at least five of each seed type

clean the seeds, inspect for holes or damage

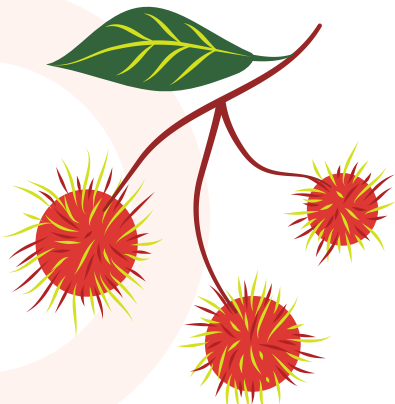

in a cool, dark, dry place, let seed dry out completely before storing them

store in air-tight containers, in a dark dry place

research and try to find out what each one is - be mindful of collecting in protected areas

consider starting a seed swap
